OBJECTIVES OF THE INTERNSHIP

The main objectives of my internship were:

- **Exploring Non-Formal Education:** My aim was to get a solid grasp of what non-formal education truly means and see firsthand how the NFE Portal operates.
- **Handling Data Management:** I wanted to gain practical experience in managing data, such as tracking attendance, evaluating student assessments, and updating results on the portal.
- **Monitoring and Documentation:** I set out to learn how study centres are monitored and how to properly maintain records for both learners and teachers.
- **Understanding Admission Requirements:** I focused on understanding why the B-Form is crucial and how data entry plays a role in the student admission process.
- **Gaining Insight into NGO Finance:** My goal was to learn the ropes of financial management in a non-profit setting, including budgeting, handling bills, processing invoices, and procurement.
- **Discovering HR Operations:** I wanted to look behind the scenes and understand how human resources function within the organization.
- **Sharpening Research Skills:** I aimed to build my literature review skills by diving into previous research, reading through it, and summarizing key findings.
- **Learning Project Management:** Finally, I wanted to understand what a Project Manager does day-to-day, specifically how they plan, lead, and monitor projects from start to finish.
